

Successful Person Project

For this project, you will research a person who you feel has been successful in their life. You must be ready to present the information about your successful person beginning _____ (choose a date 4 weeks away). We will do these presentations for 3 days. Names will be drawn from a box each day to see who will present and in which order.

Your grade will drop 10 points for each day you are not ready. Since you don't know when you'll be called, you'll need to bring everything in on that first day. I will store your props and posters so that they will be available when you're picked.

For your presentation, you will need the following:

- A poster (for the visual learner) which contains
 - Pictures of your person
 - Any pictures that help show the successful person in action
 - At least one quote from the successful person that you find memorable
- A prop that connects with your person (for the kinesthetic learner)
- A prepared verbal presentation (for the auditory learner)
- A typed paper listing the required information for me

So what do you need to tell about your person?

- Why you chose them
- What makes them successful in your eyes
- How they became successful – most people aren't instantly successful
- Approximate age right now
- What kind of education they had past high school if any
- A description of their history
- What you think they did to become the success they are

Timeline suggestions:

- Give me the name of your person no later than one week from today.
- Do the poster and bring it on by the Friday before it's due
